"Helping organizations tell visually compelling data stories."

About Go Analytics

Go Analytics offers business intelligence and analytics consulting services, specializing in Microsoft Power BI. Our creative team of Microsoft Certified analysts can help with the design and implementation of Power BI dashboards and automated reports.

Our purpose is to help all organizations create and cultivate a data culture. We do this by assisting in the creation of business intelligence and analytics tools, and through our training workshops.

Hi, I'm Klayton

I am the founder of Go Analytics and a fanatical data tinkerer.

In my 10 years experience working with data analytics, I learned that in this digital world data is our greatest asset. But, collecting the data is only half the battle. We must also make sense of it to gain insights.

I strongly believe that data-driven decisions are better decisions. Whether it's to guide corporate profitability or assist in policy-making, data-driven insights can pave the road ahead. At Go Analytics, we turn your **data** into **actionable insights**.

Power BI Consulting

Design and implement Power BI platform

Using the #1 business intelligence tool on the market, we help organizations gain actionable insights from their data and share them across the organization or with the world.

Our creative team of Microsoft Certified analysts can help design, implement, and customize Power BI dashboards and automated reports.

 Connect to data from across the organization

 Interactive experience with drill down capabilities

 Complete toolkit of compelling visualizations

 Share with colleagues or the world

Data Analysis

Data collection and predictive modelling

We can help you find or collect relevant data for your organization and build predictions from that data.

Our data analysis services are ideal for organizations that have already collected piles of data and would like to understand key trends and make predictions, or those needing help designing and implementing unbiased surveys.

 Design, implementation and analysis of administered surveys

 Predictive analytics and modelling

 Time series analysis and forecasting

 Economic analysis

Training Workshops

Empowering leaders to take on the data

Building and cultivating a data culture starts with empowering business leaders to take on the data.

Learn how to produce stunning data visualizations and lead your organization through obtaining insights from your data.

Our hands-on approach allows you to gain familiarity with working with data and data visualization tools. Individuals work with real data to create their own business intelligence tools.

In our Power BI Zero-to-Hero Masterclass, our Microsoft Certified trainer takes you through the intricacies of connecting to and transforming data, creating visualizations, and publishing reports.

How to Register
